Dear Recipient,

July should mean momentum, but unpredictable weather can still disrupt foundation work if you're using spray-applied dampproofing.

DELTA®-MS solves the weather issue.

Unlike spray systems that require dry substrates and ideal temperatures, DELTA®-MS installs in virtually any weather condition. No curing time. No return trips. No waiting on the forecast.

This month, we're showing how you can keep projects moving – weather or not.

As always, if you have any questions, let's [connect](#).

Product Spotlight:
Product Spotlight: **DELTA®-MS**

DELTA[®]-MS is a dimpled foundation membrane designed to extend your application season and simplify installation.

Why applicators choose DELTA[®]-MS:

- Install in any weather
- No spray rigs, pumps, or maintenance
- No drying or curing time
- Immediate protection once installed
- Bridges cracks
- Creates a capillary break with exclusive air-gap technology

LEARN MORE

Installing the DELTA[®]- MS
membrane in 6 easy steps

In this short training video, see how just two installers can complete a typical residential foundation in approximately one hour, following six straightforward steps.

You'll learn:

- Proper wall prep before installation
- Correct fastening techniques
- Overlap and detailing best practices
- How to terminate the membrane at grade
- How the air-gap design enhances performance

If you're looking to extend your foundation season without increasing complexity, this walkthrough is worth watching.

Advance Your Skills with DELTA® Academy

You can enhance your expertise at DELTA® Academy

Now's the time to elevate your architecture and construction expertise. At DELTA® Academy, you can unlock resources that help you exceed industry standards, streamline workflows, and embrace sustainable design. Stay ahead with cutting-edge techniques and gain the competitive edge you need.

Let DELTA® ACADEMY be your ultimate resource.

TAKE ME THERE

Last year, we announced key upgrades to our most trusted air and moisture barriers — including **DELTA®-VENT SA** — giving crews more flexibility, better durability, and longer UV protection than ever before.

Haven't seen what changed? Read our quick recap of how these durability improvements help wall systems perform through real-world delays, tough weather, and modern specs.
