

Spring into protection with DELTA®-MS:
You'll enjoy long-lasting results with Dörken.

Spring always reminds us of how the thaw can wreak havoc on projects for contractors and existing basements for homeowners. So, we'll take this time to remind you that Dörken has a complete DELTA® product portfolio to protect not only foundations but your reputation for the long haul.

Springtime is the perfect time to discover DELTA®-MS, a high-performance moisture barrier that creates an air gap to keep water away from your foundation. It's the ultimate solution to protect basements from any seasonal challenges. Keep reading to see how two people can install it in six simple steps.

Product spotlight: DELTA®-MS

As the seasons change and spring rain arrives, ensure your foundation is ready to handle the moisture. DELTA®-MS is the perfect solution for keeping basements dry and homes strong. Featuring exclusive Air-gap Technology, this innovative dimpled membrane creates a reliable barrier to protect foundation walls.

Crafted from a sustainable blend of 60% recycled and 40% virgin high-density polyethylene (HDPE), DELTA®-MS provides superior durability

and impact resistance. Its unique dimpled pattern enhances water drainage and bridges over cracks to prevent unwanted water intrusion.

This spring, choose DELTA®-MS for long-lasting moisture protection for your projects.

Installing the DELTA®-MS membrane in 6 easy steps

We know the reality. Melting snow in the spring can bring a river of water into basements. This causes headaches for homeowners in the short term but can create far worse in the long term. DELTA®-MS can provide the protection you and your clients are looking for. Check out this short video illustrating how just two people can install this membrane in approximately an hour.
