DELTA®-MS
The Foundation Wrap.

Foundation Protection System.
Keeps Basements Dry.
Dry and comfortable basements sell more homes

DELTA®-MS

The high performance air-gap membrane that keeps basements dry and mold-free.

Uniquely shaped air-gap membrane drains water away, protecting foundation walls from moisture.

- DELTA®-MS foundation protection membrane
- DELTA-FLASH prevents dirt from entering air-gap
- DELTA®-FAST'ner for secure installation
- Bridges all cracks, keeps water from entering

DELTA® quality branded products made by Dörken.

Protect your reputation.
Don’t rely on ordinary dampproofing.

Keeping foundations dry is important to avoiding costly repairs and damage to your reputation as a builder. Most foundation problems are related to unwanted moisture.

**The Problem**
Basements that are built to just meet code requirements are often damp and moldy. If the basement is to be a useable living space, proper moisture protection is necessary.

**The Solution**
DELTA®-MS provides reliable protection for permanently dry basements, keeping moisture away from foundation walls. Air-gap Technology membrane allows incidental moisture that does get past to drain harmlessly to the footer drain. DELTA®-MS is tough and durable. It keeps basements dry and comfortable even when the concrete foundation wall cracks – something asphaltic dampproofing spray can’t do.

- Available in many sizes for easy installation on various foundation heights
- Protects foundation from ground water with two lines of defense:
  - Dimple sheet provides capillary break
  - Air-gap allows incidental water to freely drain by gravity
- Eliminates interior dampness and musty odors
- Reliably bridges foundation cracks and deflects soil moisture, unlike asphaltic sprays
- Continues to function even if foundation shifts or cracks
- No unpleasant chemical odors or harmful VOC’s
- Resists damage from backfill, like rocks and debris
- High compressive strength of dimples resists soil pressure
- Durable plastic, 100 % recycled HDPE core encased by virgin HDPE
- Installs in all types of weather

**Dry and comfortable basements are a selling point**
Builders who build a better foundation have a strong point of differentiation from other builders, helping sell more homes.

Homebuyers are concerned about water in the basement of their new home. They rely on the expertise of the builder to keep their basement dry and comfortable.

Homebuyers will know that basements protected by DELTA®-MS are better, leak-free basements. Knowing that they are better built, homebuyers will purchase their new home with confidence.

**Technical data sheet available**

Keeping foundations dry is important to avoiding costly repairs and damage to your reputation as a builder. Most foundation problems are related to unwanted moisture.
DELTA®-Accessories for DELTA®-MS.

Dörken makes your life easier – systematically.

DELTA®-FAST'ner
multistud fastener for secure attachment of DELTA®-MS.

DELTA®-FLASH
angled flashing used at top of flat tab.

DELTA®-MOLDSTRIP
molding used around window cut-outs and at grade level/changes.

DELTA®-SEALANT
elastic sealing compound used at overlaps and penetrations.

The information printed in this brochure reflects product information and specifications at the date of printing. The manufacturer reserves the right to make changes when necessary. All rights reserved. DELTA®-branded quality products manufactured by Dörken.
