## DELTA®-STRATUS SA

Self-Adhered Water-resistive Barrier & Air Barrier with High UV Resistance

### MATERIAL

DELTA®-STRATUS SA is a 4-layer self-adhered water-resistive barrier (WRB) and air barrier with acrylic coating providing high UV resistance. Two layers of high strength spunbond polypropylene (PP) fabric are thermally bonded to a highly vapor permeable, watertight polymeric middle layer. The acrylic coating provides effective UV protection, allowing for the product to be exposed to sunlight for extended periods without being damaged. DELTA®-STRATUS SA maintains high vapor permeability and has a full surface coating of a high tack adhesive for bonding to common substrates. It has a split release liner for ease of application.

### PROPERTIES

DELTA®-STRATUS SA is a vapor permeable WRB, allowing moisture within the building enclosure to escape through the membrane via diffusion. Its permeability and air-tightness make it an ideal air and water-resistive barrier membrane for energy-efficient construction. The watertight membrane helps protect the building enclosure from damaging effects of moisture infiltration. It is an air barrier that meets the industry's most stringent standards. DELTA®-STRATUS SA is light-weight and tear-resistant. This membrane withstands the rigors of jobsites, extended UV exposure during construction, as well as tough wind and weather.

### APPLICATION

DELTA®-STRATUS SA is ideal for installations where extended exposure times are expected. DELTA®-STRATUS SA is installed outboard of the sheathing prior to the application of the final cladding system. Use DELTA®-LFS 100% silicone for liquid flashing and sealant applications. Do not use sealants, flashings, products or chemicals that contain surfactants on DELTA® water-resistive and air barrier membranes because they can adversely affect the water hold-out properties of any PP spunbond-based water-resistive barrier. Such products may include asphaltic materials, various chemicals, acid-based silicones, cleaning compounds, and certain formulations of liquid flashings, e.g. specific STP-based materials. Always confirm compatibility with the manufacturer's published technical data sheets and with the manufacturer's technical department. DELTA® Accessories complete an air barrier and WRB system. It may be adhered to concrete, masonry, OSB, plywood, or exterior grade drywall.

### ICC ESR-2932 DELTA® Water-resistive Barriers

DELTA® products support sustainable and energy-efficient building practices, including efforts toward achieving LEED® certification (LEED® for New Construction & Major Renovations, LEED® for Core and Shell, LEED® for Existing Buildings and LEED® for Homes).
